13 November 2025

Dear Niloy Kumar Mondal & H. M. Shadman Tabib,

Invitation to participate in the Bradford Quantum Hackathon 2025

Congratulations to you both on your success in reaching the finals of the Bradford Quantum Hackathon 2025 (<https://quantumbradford2025.com/>) as "Team NeuroCat". This follows your successful proposal for the online portion of the Hackathon.

This letter is to invite you formally to attend the Grand Finals of the Hackathon on 21 November 2025 in Bradford, West Yorkshire. The Bradford Quantum Hackathon has been organized by Quantinuum, the world leader in quantum computing, and Aqora Quantum S.A.S. in conjunction with the University of Bradford and Bradford 2025 UK City of Culture, and the Grand Finals are being held at Bradford Live. The Hackathon brings together diverse teams of experts and non-experts alike to work together on quantum solutions to real-world problems that affect everyday lives, and aims to confirm the UK, and Bradford in particular, as a centre of quantum technology innovation.

During your visit you will participate in the competitive events which make up the Grand Finals, competing against other teams from the UK and other countries. You will also have the opportunity to meet participants in the quantum computing industry and quantum academic research in the UK, as well as political and business representatives from the north of England.

I propose that you arrive in the UK on 20 November, so that you can attend the Welcome Event on the evening of 20 November. Quantinuum will then arrange one night's accommodation for you in Bradford before you participate in the Grand Finals themselves on 21 November.

I look forward to your confirmation that you accept this invitation, and I wish you every success in the Grand Final on 21 November.

Yours sincerely

Peter Sigrist
Director of Marketing Communications
